

The 10 Item Challenge

Before Rabbitstick 2023

1. Make a minimum of 10 items using primitive skills and materials. These should include combustion, cutting edge, cordage, cover and a container.
2. Go out to a “wildish place” and
 - Make a shelter
 - Make a fire
 - Make a meal
 - Stay overnight
3. Additional modern equipment is okay as the location, safety and weather requires. For example, appropriate-clothing, sufficient water in appropriate container or a water filter, sleeping blankets or bag, headlamp. Be safe out there.
4. Consider including foraging or bringing wild foods as well.!
5. No electronics; except a camera.
6. The goal is not a survival challenge, but integrating your primitive skills into a “Thrival” experience. Take your skills to the next level.

Then at Rabbitstick, for our contribution to the community we'll gather for sharing our after-action reports and displaying the 10 items we made. Prepare a 5-minute presentation, including the context of the things you made.

~~Note:~~ Since Alice will be out hiking all summer, Candy has volunteered to be the contact person for questions about the challenge. Email Candy at southerntricksters@gmail.com
